

Site Architecture Template

Fill the hierarchy from left to right. Keep one node per page type or section, not one node per URL.

Depth guidance: keep priority pages within about 3 clicks of a strong hub where practical; avoid unnecessary deep chains.

Annotation key

[Indexable?]

[Primary intent]

[Owner]

[Internal link source]

[Notes / risk]

Rules: draw only useful page-type relationships; mark generated URL states separately; avoid making every filter or tag a default landing page.

Decision note: [What this architecture should change in navigation, internal links or indexation controls.]
